

Feeding Europe while reducing pesticide dependency

19 November 2015

09:30 - 17:00

SUPD Symposium 2015
European Parliament, JAN4Q2

Dear Member of the European Parliament

We would like to invite you to the fourth edition of our symposium “Feeding Europe while reducing pesticide dependency“.

At the symposium, experts will share their experience on the growing demand and market for non-chemical tools as alternatives to pesticides in pest management. Farmers, scientists, industry, NGOs and co-operative retailers will present insights and ways forward to significantly reduce pesticide dependency.

This year the symposium will also address the economic opportunities that reducing pesticide dependency provides, as well as present concrete and promising changes to move from intensive apple production to sustainable apple growing.

Participants will, in addition, discuss the progress and limitations of Member States’ implementation of the EU Directive on Sustainable Use of Pesticides (SUPD; EC/128/2009).

The Symposium is organised by:
Euro Coop, Greenpeace, IBMA, IOBC-WPRS and PAN Europe.

The event is hosted by MEP Pavel Poc (S&D), Vice-Chair of the Committee for Environment, Public Health and Food Safety.

Please register for this event [here](#) or via email to symposiumsupd@gmail.com. Please note: registration is mandatory to enter the EU Parliament.

If you need further information about the symposium contact:
Marco Contiero, Greenpeace EU Agriculture Policy Director:
